

Compile all the following f.90 files:

- main.f90
- globvar.f90
- likelihood.f90
- matrix.f90
- nrutil.f90
- random.f90

and run. Then, the code will use "dta_all.out", "dta_large.out", "dta_medium.out", and "dta_small.out" to produce and print the results in Table 6 (baseline results) and Table 7 (test conditional on market size).
