

Replication files for ESTIMATION OF NONPARAMETRIC MODELS WITH SIMULTANEITY by Rosa L. Matzkin

MATLAB programs for the simulations presented in Section 5 can be found in the folder corresponding to each subsection in the paper. In Section_5.1, main.m generates the data and runs the simulations. In Section_5.2, main_oneinst.m generates the data and runs the simulations. In Section_5.3, gendata.m generates the data and main_ind.m runs the simulations.

The development of the programs was supported by NSF through grants SES-0833058 and SES-1062090. Matthew Baird, Anastasia Burkovskaya, David Kang, Yulong Wang, and Kyle Woodward provided excellent research assistance.
