

Compile all the following f.90 files:

- main.f90
- globvar.f90
- likelihood.f90
- matrix.f90
- nrutil.f90
- random.f90
- simplex.f90

and run. Then, the code will use "dta_all.out" and "dta_large.out" to produce and print the results in Table 8 (test accounting for unobserved types).
